

# ABDELRAHMAN MAHMOUD

## Junior AWS Cloud Security Engineer | DevSecOps

Beheira, Egypt • +20 101 765 7037 • [abdelrahman.teaima@gmail.com](mailto:abdelrahman.teaima@gmail.com) • [linkedin.com/in/abdelrahman-teaima](https://linkedin.com/in/abdelrahman-teaima) • [github.com/abdelrahmanmahmo](https://github.com/abdelrahmanmahmo)

### PROFESSIONAL SUMMARY

Security-focused **Junior AWS Cloud Security Engineer** with strong academic background in Information Technology and extensive hands-on laboratory experience securing Amazon Web Services (AWS) environments. Skilled in **AWS IAM policy design**, principle of least privilege, cloud network isolation (VPC, Security Groups, NACLs), Infrastructure as Code (Terraform), and proactive security automation with Python (Boto3). Proficient in centralizing audit logs via CloudTrail/CloudWatch, implementing automated threat detection via GuardDuty and Security Hub, and integrating security scanners (Trivy, tfsec, Checkov) into CI/CD DevSecOps pipelines.

### TECHNICAL SKILLS

|                                        |                                                                                                                                                |
|----------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>AWS Cloud Security:</b>             | AWS IAM (Policies, Roles, SCPs), AWS GuardDuty, Security Hub, AWS WAF, AWS KMS (Key Management), Secrets Manager, AWS Inspector, AWS Shield.   |
| <b>AWS Architecture &amp; Network:</b> | Amazon VPC, Subnetting, Route Tables, Internet / NAT Gateways, Security Groups, NACLs, VPC Flow Logs, EC2, S3 Security & Bucket Policies.      |
| <b>DevSecOps &amp; IaC:</b>            | Terraform (IaC Security), Docker, Container Security, GitHub Actions, Static Code Analysis & IaC Scanning (tfsec, Checkov, Trivy, SonarQube).  |
| <b>Logging, SIEM &amp; Auditing:</b>   | AWS CloudTrail, AWS CloudWatch (Alarms, Metric Filters, EventBridge), AWS Config, Incident Response, CIS AWS Foundations Benchmark compliance. |
| <b>Systems &amp; Scripting:</b>        | Linux Administration (Ubuntu, RHEL, Kali), Bash Scripting, Python (AWS Boto3 SDK, Security Automation), Git/GitHub.                            |

### HANDS-ON AWS SECURITY PROJECTS

#### Automated AWS Security Posture & Compliance Hardening | [AWS](#), [Terraform](#), [Checkov](#), [CloudTrail](#) 2026

- Architected and provisioned a fully automated multi-tier VPC architecture in AWS using **Terraform** aligned with the **CIS AWS Foundations Benchmark**.
- Implemented automated Infrastructure-as-Code (IaC) security scanning using **tfsec** and **Checkov** in CI/CD to prevent misconfigured S3 buckets, open security groups, and unencrypted EBS volumes.
- Configured centralized, tamper-proof audit logging with **AWS CloudTrail** sent to an isolated S3 bucket protected with KMS encryption and MFA Delete.

#### Automated Threat Detection & Incident Response Pipeline | [AWS GuardDuty](#), [Lambda](#), [SNS](#), [EventBridge](#) 2025 – 2026

- Deployed **Amazon GuardDuty** and **AWS Security Hub** across accounts to continuously monitor VPC Flow Logs, DNS logs, and CloudTrail for malicious activities.
- Built an automated incident response workflow using **Amazon EventBridge** and **AWS Lambda (Python Boto3)** to automatically isolate compromised EC2 instances and revoke compromised IAM credentials.
- Configured real-time security alerts sent directly to administrator channels via **Amazon SNS**.

#### Secure Container Pipeline & DevSecOps CI/CD | [AWS ECR](#), [Docker](#), [Trivy](#), [GitHub Actions](#) 2025

- Built a secure CI/CD pipeline using **GitHub Actions** that builds Docker container images and automatically scans them for vulnerabilities using **Trivy**.
- Hardened container configurations by utilizing minimal base images (Alpine/Distroless), non-root users, and automated secrets scanning (TruffleHog).
- Automated secure image pushing to **Amazon Elastic Container Registry (ECR)** with basic scan on push enabled.

### EDUCATION

#### Bachelor of Information Technology (IT) 2023 – 2027 (Expected)

Sinai University | Faculty of Information Technology • **Grade: Excellent**

### CERTIFICATIONS & TRAINING

- AWS Certified Solutions Architect – Associate (SAA-C03)** (In Progress)
- AWS Certified Cloud Practitioner (CLF-C02)**
- DEPI - Cloud & Cybersecurity Track** | Practical Training
- ITI - Network Security & Cloud Architecture Training**
- TryHackMe & PortSwigger:** AWS Cloud Security & Web App Security Labs
- Red Hat Enterprise Linux (RHCSA Fundamentals)**

### SOFT SKILLS & LANGUAGES

**Languages:** Arabic (Native), English (Professional Working Proficiency - B2/C1)

**Core Competencies:** Cloud Threat Modeling, Root Cause Analysis, Security Auditing, Technical Problem-Solving, Teamwork.
